

The Benefits of Paintless Dent Repair

Paintless Dent Repair, an innovative repair process for dents and dings, uses specialized tools to massage and flex metal back to its original form. It's perfect for small dings, like those caused by hail, where the metal is dented but the paint is intact. Our certified technicians can remove small dents and dings from your vehicle's metal surfaces without harming its factory finish.

Why use PDR LINX for your Hail Repairs?

- Maintains factory finish and doesn't void factory paint warranty
- Lifetime warranty with a 100% customer satisfaction guarantee
- Minimizes vehicle depreciation
- Repairs performed by fully insured, certified Hail Technicians
- 24/7 customer service available
- Deductible assistance plans available
